The epic story also told in the film FORD V. FERRARI: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Rare black-and white historic images combine with more than two hundred modern color photographs to complement a narrative written by some of the commonwealth's most celebrated wordsmiths: Thomas D. Clark, George Ella Lyon, John Ed Pearce, Gerald L. Smith, Michal Smith-Mello, and Michael T. Childress. Photographs by Dan Dry of Louisville, Kentucky. excerpt: Where are you from? ""Kentucky,"" I say. I'm from a place where people still stop for funerals, where they know who your grandmother was, where they tell stories at Corn Island at the state park at the dinner table where they pass on their youngest's outgrown clothes and bring a casserole as soon as someone dies. --George Ella Lyon

The photos in this edition are black and white. Before the introduction of the 05+ models, 1994-'04 Mustangs represented a high-water mark for late- model Mustang enthusiasts. From the '94-'95s with the 5.0L, through the '96-'04 models with the 2- and 4-valve 4.6Ls, to the Bullitt, Mach 1, and factory supercharged '03-'04 Cobras - never before has such a range of highly modifiable performance cars been available. These Mustangs were great performers straight from the factory, but they can be even better with the right

combination of performance parts. Regardless of which '94-'04 Mustang you start with, the availability of high-performance parts is impressive. You can build your Mustang for drag racing, road racing, or improved street performance - and High-Performance Mustang Builder's Guide 1994-2004 will show you how! Author Sean Hyland uses over 300 photos to explain how to upgrade your Mustang's engine, suspension, chassis, transmission, rear end, brakes, and body. There's even a special chapter on getting active in various forms of organized racing.

Morels are prized edible mushrooms that fruit, sometimes prolifically, in many forest types throughout western North America. They are collected for personal consumption and commercially harvested as valuable special (nontimber) forest products. Large gaps remain, however, in our knowledge about their taxonomy, biology, ecology, cultivation, safety, and how to manage forests and harvesting activities to conserve morel populations and ensure sustainable crops. This publication provides forest managers, policymakers, mycologists, and mushroom harvesters with a synthesis of current knowledge regarding these issues, regional summaries of morel harvesting and management, and a comprehensive review of the literature.

Author Trenton McGee, 4x4 suspension expert and host of Outdoor Channels Off-Road Adventures, explains 4x4 suspension systems in an easy-to-understand manner. He gets specific on types of suspensions available from all the major manufacturers including Jeep, Toyota, Ford, Chevy, and Dodge. He goes into a great level of detail on every different model, including early and modern model systems.

How do organizations structure themselves? A synthesis of the empirical literature in the field, supported by numerous examples and illustrations, provides images that produce a theory. The author introduces five basic configurations of structure - the simple structure, the machine bureaucracy, the professional bu- reaucracy, the divisionalized form, and the adhocracy. This book reveals that structure seems to be at the root of many questions about organizations and why they function as they do.
