

Good Research Paper Topic

Research like a pro-and write a winning paper! Do research papers make you nervous? Don't panic! This task isn't as overwhelming as it may seem--and conducting good research is an important skill to have. With How to Write a Great Research Paper,you'll see how easy and rewarding it can be to explore a topic and present your ideas in an organized and interesting way. Filled with easy-to-follow instructions and valuable tips, this new guide breaks the entire process down into 7 Keys to Success: * Find a Topic * Look It Up * Take Notes * Outline Your Paper * Create Your First Draft * Revise and Edit Your Draft * Present Your Paper So take a deep breath, relax-and get ready to write a top-notch research paper!

365 Creative Writing Prompts

This softcover text centers on the communication skills necessary for conducting a successful job search or making a change in jobs. The ability to conduct research online, present a professional image, and communicate well with potential employers is critical to any job search. The workshops provided give instruction on how to create effective resumes and cover letters, search for job information, prepare for a successful interview, understand job expectations, and make a job change. Multimedia components enhance the impact of the workshops so users can complete a variety of exercises on the computer, watch video footage of people effectively communicating on the job, and use the Internet to conduct further research.

This Second Edition of Diana Ridley's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

This concise paperback is one of the best known guides to writing a paper for publication in biomedical journals. Its straightforward format – a chapter covering each of part of the structured abstract – makes it relevant and easy to use for any novice paper writer. How to Write a Paper addresses the mechanics of submission, including electronic submission, and how publishers handle papers, writing letters to journals abstracts for scientific meetings, and assessing papers. This new edition also covers how to write a book review and updated chapters on ethics, electronic publication and submission, and the movement for open access.

This is an invaluable, concise, all-in-one guide for carrying out student research and writing a paper, adaptable to course use and suitable for use by students independently, it successfully guides students along every step of the way. Allows students to better manage their research projects Exercises and worksheets break down the research process into small steps and walk students through each stage of the research project Offers real-world and lively examples that are attractive and relevant to students Based on twenty years of experience in teaching research techniques to students in a way that avoids the methodology “overkill” from encyclopaedic and intimidating textbooks Accompanying website includes powerpoint lecture slides for instructors and helpful links to video resources for student. Visit www.wiley.com/go/wang/researchreportwriting

This primer for undergraduates explains how to write a clear, compelling, well-organized research paper, with tips and illustrated examples for each step of the process.

"Two products in one—the complete Collegiate Dictionary, Eleventh Edition and the Collegiate Thesaurus. 21 search options and more than 1,300 illustrations. Full text fits on most hard drives for extra convenience."\\\\\\

Every theology student has to write a research paper, but many do not know how to go about doing theological research. In this brief guide, Michael Kibbe introduces students to the basics of academic research, including how to gather and engage different sources, use online databases and bibliography software, and avoid common mistakes.

Presents a guide to researching popular topics for high school reports, helps students locate print and non-print resources, and discusses bibliographic citations and note-taking

Research like a pro-and write a winning paper! Do research papers make you nervous? Don't panic! This task isn't as overwhelming as it may seem--and conducting good research is an important skill to have. With How to Write a Great Research Paper, you'll see how easy and rewarding it can be to explore a topic and present your ideas in an organized and interesting way. Filled with easy-to-follow instructions and valuable tips, this new guide breaks the entire process down into 7 Keys to Success: * Find a Topic * Look It Up * Take Notes * Outline Your Paper * Create Your First Draft * Revise and Edit Your Draft * Present Your Paper So take a deep breath, relax-and get ready to write a top-notch research paper!

The Institute for Computer Applications in Science and Engineering (ICASE) and NASA Langley Research Center (LaRC) brought together on October 2-4, 1989 experts in the various areas of combustion with a view to expose them to some combustion problems of technological interest to LaRC and possibly foster interaction with the academic community in these research areas. The topics chosen for this purpose were flame structure, flame stability, flame holding/extinction, chemical kinetics, turbulence-kinetics in interaction, transition to detonation, and reacting free shear layers. The lead paper set the stage by discussing the status and issues of supersonic combustion relevant to scramjet engine. Then the experts were called upon i) to review the current status of knowledge in the aforementioned areas, ii) to focus on how this knowledge can be extended and applied to high-speed combustion, and iii) to suggest future directions of research in these areas. Each topic was then dealt with in a position paper followed by formal discussion papers and a general discussion involving the participants. The position papers discussed the state-of-the-art with an emphasis on key issues that needed to be resolved in the near future. The discussion papers critically examined these issues and filled in any lacunae therein. The edited versions of the general discussions in the form of questions from the audience and answers from the speakers are included wherever possible to give the reader the flavor of the lively interactions that took place.

Foreword by Richard J. Stevenson, Macquarie University (Australia). It was long thought that the human nose might be able to discriminate somewhere in the order of 10,000 different odourants. The recent finding that the human nose can discriminate something like a trillion different smells serves as yet another reminder that we have again underestimated the capacity of our sense of smell (Bushdid, Magnasco, Vosshall & Keller, 2014). This volume serves as a further corrective for anyone who should hold the view that olfaction is unimportant in human affairs. The papers presented in this ebook, carefully collated and overseen by Aldo Zucco, Benoist Schaal, Mats Olsson and Ilona Croy, showcase a large number of quite different reasons for studying the applied side of olfaction, and indeed human olfaction in general. The 23 contributions presented here cover a broad range of topics, which illustrate contemporary interests in our

field. Although with a strong applied focus, a noteworthy feature of this ebook is the richness of the theoretical perspectives that are developed. These range from considerations of olfactory perception, memory, expertise, and priming right the way through to receptor genetics. These contributions, from many leading experts in the field, will surely shape much of the applied work linking olfaction to disease, which is a further focus of this ebook. In respect to health and disease, the chapters on aging, pregnancy, depression, alcohol dependency and environmental odours, present overviews and rich new data on many contemporary problems, to which the study of olfaction is now contributing. A particularly notable aspect of olfactory experience is the affective impact that odours can have on people and their lives. The ebook covers some particularly intriguing aspects of work in this area, with empirical studies investigating dissociations between wanting and liking, stress reduction in the elderly, mother-infant bonding, and the emotions that different odourants can evoke. This affective line of work is nicely complemented by empirical studies on expertise, the effect of odours on visual attention, and the relationship between particular personality traits and interest in olfaction. The gradual appropriation of methods from cognitive neuroscience into olfaction is also nicely represented in this ebook, with at least three of the chapters reporting data using neuroimaging, including a particular intriguing study looking at recognition of odours in mixtures. Finally, the close links between olfactory perception and sensory evaluation are also reflected in a chapter on wine. I hope that readers of this e-book will be struck, as I have been in reading its various chapters, how much olfaction affects our lives, and how the study of this sense can enrich it. References Bushdid, C., Magnasco, M., Vosshall, L. & Keller, A. (2014). Humans can discriminate more than 1 trillion olfactory stimuli. *Science*, 343, 1370-1372.

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. “You know something!” I would say if it could hear me. “Now tell it to us in language we can understand!” Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add “author” to their curriculum vitae.

The scientific field of leadership and followership is fast evolving and has seen several interesting developments over recent years. The early heroic views of leadership are slowly turning into more nuanced perspectives, including the understanding that leadership and followership are mutually dependent on each other. Likewise, there is a growing awareness that the focus on the positive side of leadership and followership can be fruitfully complemented by a focus on the darker sides of these constructs. According to the latest research plenty of “grey areas” exist, where further insights into leadership and followership are needed. We seek to emphasize the different shades of dark leadership by taking leaders, followers, and their interaction in specific contexts into account. Accordingly, many of the findings presented in this Research Topic align with a deviation away from the idea of the omnipotent leader. Not only leaders’ dark traits such as narcissism and psychopathy, but also followers’ Machiavellianism emerged as hindering factors for positive organizational functioning. Other results presented in this Research Topic will be fruitful to explain what drives leaders towards dark-side behaviors, the consequences of dark-side leader behaviors (e.g., different types of destructive leadership), and how followers respond to them (e.g., follower attributions of perceived abusive supervision). Contributions to this Research Topic are also pushing the boundaries of current theorizing, shedding further light on the “shades of grey,” when it comes to the possibly unintended negative consequences of leadership and followership. In sum, the dark sides of leadership and followership are a natural part of an organizational reality that many employees face day in and day out. The aim of this Research Topic is to encourage an integrative view of leadership and followership and their dark sides, for a better understanding of complex organizational systems and implications for better practice.

George Orwell set out ‘to make political writing into an art’, and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell’s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the *Orwell’s Essays* series, Orwell takes aim at the language used in politics, which, he says, ‘is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind’. In an age where the language used in politics is constantly under the microscope, *Orwell’s Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. ‘A writer who can – and must – be rediscovered with every age.’ — *Irish Times*

This concise book gives tangible advice on how to write a good academic research paper. It is useful for those writing short essays, one-year projects, bachelor's projects, or master's theses. The book offers: -A quick overview of how to write an academic research paper ways to organize the process of writing an academic research paper. -An overview of the most common problems encountered when writing academic research papers. -Practical guidelines that can be used throughout the writing process and during the examination an understanding of some of the different research. -Methodologies advice on how to obtain good grades on exams. On this site, www.researchpaper.samfundslitteratur.dk, you can find a range of potential research topics appropriate for short and long research papers. You can also find several examples illustrating and further explaining the advice contained in this book, including examples of research questions, analyses, theories, introductions, methodology chapters, and more.

Presents a chronology of the life of author Flannery O’Conner, comments and letters by the author about the story, and a series of ten critical essays by noted authors about her work.

This booklet is designed to guide the student through the process of writing a research paper- from selecting a topic to polishing the final draft. Writing a Research Paper will develop the skills that will benefit the student in every area of life, now and in the future.

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

The best-selling workbook and grammar guide, revised and updated! Hailed as one of the best books around for teaching grammar, The Blue Book of Grammar and Punctuation includes easy-to-understand rules, abundant examples, dozens of reproducible exercises, and pre- and post-tests to help teach grammar to middle and high schoolers, college students, ESL students, homeschoolers, and more. This concise, entertaining workbook makes learning English grammar and usage simple and fun. This updated Twelfth Edition reflects the latest updates to English usage and grammar and features a two-color design and lay-flat binding for easy photocopying. Clear and concise, with easy-to-follow explanations, offering "just the facts" on English grammar, punctuation, and usage Fully updated to reflect the latest rules, along with quizzes and pre- and post-tests to help teach grammar Ideal for students from seventh grade through adulthood in the US and abroad For anyone who wants to understand the major rules and subtle guidelines of English grammar and usage, The Blue Book of Grammar and Punctuation offers comprehensive, straightforward instruction.

Featuring an engaging, direct writing style and inquiry-based approach, "The Curious Researcher" stresses that curiosity is the best reason for investigating ideas and information. KEY BENEFIT: Offering a wide variety of examples from writers, this popular guide shows that good research and lively writing do not have to be mutually exclusive. Readers are encouraged to find ways to bring their writing to life, even though they are writing with " facts." Full explanations of the technical aspects of writing and documenting source-based papers help students develop sound research and analysis skills. Topics include information on selecting a research topic, the latest information on Internet research, advice on structuring a research paper, and full treatment of MLA and APA citation formats. Research, General Interest

Presents a guide to writing a research paper, covering such topics as finding sources, taking research notes, creating an outline, writing the first draft, and completing the final version.

All researchers want to produce interesting and influential theories. A key step in all theory development is formulating innovative research questions that will result in interesting and significant research. Traditional textbooks on research methods tend to ignore, or gloss over, actual ways of constructing research questions. In this text, Alvesson and Sandberg develop a problematization methodology for identifying and challenging the assumptions underlying existing theories and for generating research questions that can lead to more interesting and influential theories, using examples from across the social sciences. Established methods of generating research questions in the social sciences tend to focus on 'gap-spotting', which means that existing literature remains largely unchallenged. The authors show the dangers of conventional approaches, providing detailed ideas for how one can work through such problems and formulate novel research questions that challenge existing theories and produce more imaginative empirical studies. Constructing Research Questions is essential reading for any researcher looking to formulate research questions that are interesting and novel.

Provides information on stylistic aspects of research papers, theses, and dissertations, including sections on writing fundamentals, MLA documentation style, and copyright law.

Project management as a discipline has experienced near-exponential growth in its application across the business and not-for-profit sectors. This original, authoritative guide provides both practitioner and student researchers with a complete guide to research practice on project management. In Designs, Methods and Practices for Research of Project Management, Beverly Pasian has brought together original chapters from a veritable who's who of project management research including authors such as Harvey Maylor, Christophe Bredillet, Derek Walker, Miles Shepherd, Janice Thomas, Naomi Brookes and Darren Dalcher. The collection looks at research strategy, management, methodology, techniques as well as emerging topics such as social network analysis. The 38 chapters offer an international perspective with examples from a wide range of project management applications; engineering, construction, mega-projects, high-risk environments and social transformation. Each chapter includes tips and exercises for the research student, as well as a complete set of further references.

BEST GIFT IDEA 2018 - SPECIAL PRICE- Normally \$16.95 (WHILE STOCKS LAST) Creative Writing Prompts Are you ready for new challenges guaranteed to help you improve your creativity, writing and conceptual skills in just a few short hours? With 365 creative writing prompts, you can. Remove yourself from your comfort zone, and start to explore the uncharted paths to finding new and improved writing styles to benefit you. 365 creative writing prompts is guaranteed to be the perfect writing companion. New Creative Writing Prompts

Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related

entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version. This volume contains the proceedings of a workshop held at Drexel University from September 1 to September 3, 1980, under the joint auspices of Drexel University, The University of Tennessee and Vanderbilt University. The workshop dealt with subjects of topical importance to the nuclear physics community: high spin phenomena, heavy ion reactions, transfer reactions, microscopic theories of nuclear structure and the interacting boson model, and miscellaneous topics. This proceedings contains all of the invited papers plus short manuscripts expanding on the materials of the invited papers. A total of about 85 participants came to the workshop. The format of the conference was kept informal on purpose, so as to facilitate the discussions. Unfortunately, these discussions, at times intense, could not be included in this volume due to the lack of secretarial help during the meeting. A great deal of current information was exchanged during the conference. However, the full impact of a conference can only be realized when the proceedings have been published and read by participants as well as other colleagues in this field of physics who were not in attendance. We sincerely hope that these proceedings will be useful in this regard.

Covers all elements of effective and grammatically-correct writing, including electronic formats, for any type of situation from research papers to business memos.

Tomorrow's Professor is designed to help you prepare for, find, and succeed at academic careers in science and engineering. It looks at the full range of North American four-year academic institutions while featuring 30 vignettes and more than 50 individual stories that bring to life the principles and strategies outlined in the book. Tailored for today's graduate students, postdocs, and beginning professors, Tomorrow's Professor: Presents a no-holds-barred look at the academic enterprise Describes a powerful preparation strategy to make you competitive for academic positions while maintaining your options for worthwhile careers in government and industry Explains how to get the offer you want and start-up package you need to help ensure success in your first critical years on the job Provides essential insights from experienced faculty on how to develop a rewarding academic career and a quality of life that is both balanced and fulfilling Bonus material is available for free download at <http://booksupport.wiley.com> At a time when anxiety about academic career opportunities for Ph.D.s in these field is at an all-time high, Tomorrow's Professor provides a much-needed practical approach to career development.

Lecturers, request your electronic inspection copy here This superb guide teaches you how to read critically. Its no-nonsense, practical approach uses a specially developed reading code to help you read articles for your research project; this simple code enables you to decipher journal articles structurally, mechanically and grammatically. Refreshingly free of jargon and written with you in mind, it's packed full of interdisciplinary advice that helps you to decode and critique academic writing. The author's fuss free approach will improve your performance, boost your confidence and help you to: Read and better understand content Take relevant effective notes Manage large amounts of information in an easily identifiable and retrievable format Write persuasively using formal academic language and style. New to this edition: Additional examples across a range of subjects, including education, health and sociology as well as criminology Refined terminology for students in the UK, as well as around the world More examples dealing specifically with journal articles. Clear, focused and practical this handy guide is a great resource for helping you sharpen your use of journal articles and improve your academic writing skills. 'I have used the book over the last five years with my students with great success. The book has helped students to develop their critical thinking, reading and writing skills and when it comes to writing a dissertation they have used the code sheet in their own writing.' - Pete Allison, Head of the Graduate School of Education, University of Edinburgh SAGE Study Skills are essential study guides for students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university. Visit the SAGE Study Skills hub for tips, resources and videos on study success!

Paragraph Development helps students edit their own writing for clarity and accuracy and offers a three-phase strategy for building writing skills through planning, writing, and revising. The approach in each chapter is direct and functional: a model is provided and graphically explained, then students use the model to write their own paragraphs.-- Offers controlled information-transfer exercises, a choice of writing topics, and peer consultation and writing-evaluation methods.

Despite their changing role, abstracts remain useful in the digital world. Highly beneficial to information professionals and researchers who work and publish in different fields, this book summarizes the most important and up-to-date theory of abstracting, as well as giving advice and examples for the practice of writing different kinds of abstracts. The book discusses the length, the functions and basic structure of abstracts, outlining a new approach to informative and indicative abstracts. The abstractors' personality, their linguistic and non-linguistic knowledge and skills are also discussed with special attention. Despite the relatively large number of textbooks on the topic there is no up-to-date book on abstracting in the English language In addition to providing a comprehensive coverage of the topic, the proposed book contains novel views - especially on informative and indicative abstracts The discussion is based on an interdisciplinary approach, blending the methods of library and information science and linguistics

The collection demonstrates the ways in which established traditions and scholars have come together under the umbrella of linguistic ethnography to explore important questions about how language and communication are used in a range of settings and contexts, and with what effect.

The Legacy of Mesoamerica: History and Culture of a Native American Civilization summarizes and integrates information on the origins, historical development, and current situations of the indigenous peoples of Mesoamerica. It describes their contributions from the development of Mesoamerican Civilization through 20th century and their influence in the world community. For courses on Mesoamerica (Middle America) taught in departments of anthropology, history, and Latin American Studies.
