The purpose of this volume is to investigate the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. It aims to collect and organize in one database all the digitalised versions of the first editions of Greek grammars, lexica and school texts available in Europe in the 14th and 15th centuries, between two crucial dates: the start of Chrysoloras's teaching in Florence (c. 1397) and the end of the activity of Aldo Manuzio and Andrea Asolano in Venice (c. 1529). This is the first step in a major investigation into the knowledge of Greek and its dissemination in Western Europe: the selection of the texts and the first milestones in teaching methods were put together in that period, through the work of scholars like Chrysoloras, Guarino and many others. A remarkable role was played also by the men involved in the Council of Ferrara (1438-39), where there was a large circulation of Greek books and ideas. About ten years later, Giovanni Tortelli, together with Pope Nicholas V, took the first steps in founding the Vatican Library. Research into the return of the knowledge of Greek to Western Europe has suffered for a long time from the lack of intersection of skills and fields of research: to fully understand this phenomenon, one has to go back a very long way through the tradition of the texts and their reception in contexts as different as the Middle Ages and the beginning of Renaissance humanism. However, over the past thirty years, scholars have demonstrated the crucial role played by the return of knowledge of Greek in the transformation of European culture, both through the translation of texts, and through the direct study of the language. In addition, the actual translations from Greek into Latin remain poorly studied and a clear understanding of the intellectual and cultural contexts that produced them is lacking. In the Middle Ages the knowledge of Greek was limited to isolated areas that had no

reciprocal links. As had happened to many Latin authors, all Greek literature was rather neglected, perhaps because a number of philosophical texts had already been available in translation from the seventh century AD, or because of a sense of mistrust, due to their ethnic and religious differences. Between the 12th and 14th century AD, a change is perceptible: the sharp decrease in Greek texts and knowledge in the South of Italy, once a reference-point for this kind of study, was perhaps an important reason prompting Italian humanists to go and study Greek in Constantinople. Over the past thirty years it has become evident to scholars that humanism, through the re-appreciation of classical antiquity, created a bridge to the modern era, which also includes the Middle Ages. The criticism by the humanists of medieval authors did not prevent them from using a number of tools that the Middle Ages had developed or synthesized: glossaries, epitomes, dictionaries, encyclopaedias, translations, commentaries. At present one thing that is missing, however, is a systematic study of the tools used for the study of Greek between the 15th and 16th century; this is truly important, because, in the following centuries, Greek culture provided the basis of European thought in all the most important fields of knowledge. This volume seeks to supply that gap.

Behold an Animal examines the philosophical significance of animals in the French novel today. It contributes to critical scholarship on contemporary French literature, comparative literature, Derrida and Deleuze studies, and animal studies.

The Great Lakes region of Africa has seen dramatic changes. After a decade of war, repression, and genocide, loosely allied regimes have replaced old-style dictatorships. The Path of a Genocide examines the decade (1986-97) that brackets the 1994 genocide in Rwanda. This collection of essays is both a narrative of that event and a deep reexamination of the international role in addressing humanitarian issues and complex emergencies. Nineteen donor countries and seventeen multilateral organizations, international agencies, and international nongovernmental organizations pooled their efforts for an in-depth evaluation of the

international response to the conflict in Rwanda. Original studies were commissioned from scholars from Uganda, Rwanda, Zaire, Ethiopia, Norway, Great Britain, France, Canada, and the United States. While each chapter in this volume focuses on one dimension of the Rwanda conflict, together they tell the story of this unfolding genocide and the world's response. The Path of a Genocide offers readers a perspective in sharp contrast to the tendency to treat a peace agreement as the end to conflict. This is a detailed effort to make sense of the political crisis and genocide in Rwanda and the effects it had on its neighbors.

Cameroon has strong goals for its growth and development. By 2035, it aims to be an emerging economy. The country's medium-term goals are focused on alleviating poverty, consolidating democracy, and achieving national unity—while respecting diversity. This report contributes substantively to the Government's vision on Strategy for Growth and Employment, putting human development and employment at center stage. Cameroon faces three main challenges: • Developing more robust formal and informal employment opportunities by strengthening human development. • Increasing productivity in agriculture, mining, and key value chains (timber, tourism, and information and communication technology). • Advancing growth by investing in infrastructure and improving the business climate and regional integration. The Strategy sets a target for reducing underemployment from 76 percent of the workforce to 50 by 2020 by creating tens of thousands of formal jobs. But based on results from the first two years of its implementation, the strategy is far from achieving that target. This report is meant to support Cameroon's efforts to build the skills of its workers. This report reaches conclusions and offers policy recommendations to answer six questions: • What has been the trajectory of Cameroon's economic growth? Which sectors have contributed to growth? • What jobs are being created? •

What types of skills are being used in the sectors where the highest percentages of the population are employed? • What are the demand and supply barriers to skills? • Which policies and institutions are in play? Are they sufficient? • What needs to or could be reformed? Cameroon has good prospects for moving to middle-income status. It can create a more dynamic, responsive workforce. But a new strategy is required. It can be done. This report proposes new directions and provides recommendations. Outcomes are expected. Work has never been easy. But many have been working—and Cameroon can work.

Ten year old Ferius Parfax has a simple plan: kill every last inhabitant of the spell-gifted nation that destroyed her people, starting with the man who murdered her parents. Killing mages is a difficult business, of course, so Ferius undertakes to study the ways of the Argosi: the loosely-knit tribe of tricksters known for getting the better of even the most powerful of spellcasters. But the Argosi have a price for their teachings, and by the time Ferius learns what it is, it may be too late. Perfect for fans of The Dark Tower, Firefly, Guardians of the Galaxy, Terry Pratchett, Ben Aaronovitch and Jim Butcher.

The authors in this volume explore the interconnected issues of intergenerational trauma and traumatic memory in societies with a history of collective violence across the globe. Each chapter's discussion offers a critical reflection on historical trauma and its repercussions, and how memory can be used as a basis for dialogue and transformation. The perspectives include, among others: the healing journey of three generations of a family of Holocaust survivors and their dialogue with third generation German students over time; traumatic memories of the British concentration camps in South Africa; reparations and reconciliation in the context of the historical trauma of Aboriginal Australians; and the use of the arts as a strategy of dialogue and transformation.

In the essays and lectures here titled Neganthropocene, Stiegler opens an entirely new front moving beyond the dead-end "banality" of the Anthropocene. 'One hell of a good book' - Conn Iggulden The Greatcoats - legendary heroes, arbiters of justice . . . or notorious traitors? The Greatcoats are travelling magistrates bringing justice to all . . . or at least they were, before they watched the Dukes impale their King's head on a spike. Now the land's heroes are reviled as traitors, their Greatcoats in tatters. Falcio, Kest and Brasti have been reduced to working as mercenaries, but when they find their employer dead - and are forced to watch as the killer plants evidence framing them for the murder - they realise things are about to get even worse. For the royal conspiracy that began with overthrowing an idealistic young king is spreading to Rijou, the most corrupt city in the land, and the life of a young girl hangs in the balance. When every noble is a tyrant and every knight is a thug, the only thing you can really trust is a traitor's blade.

After years of struggle and sacrifice, Falcio val Mond, First Cantor of the Greatcoats, is on the brink of fulfilling his dead king's dream: Aline, the king's daughter, is about to take the throne and restore the rule of law once and for all. But for the Greatcoats, nothing is ever that simple. In the neighboring country of Avars, an enigmatic new warlord is uniting the barbarian armies that have long plagued Tristia's borders--and even worse, he is rumored to have a new ally: Trin, who's twice tried to kill Aline to claim the throne of Tristia for herself. With the armies of Avars at her back, led by a bloodthirsty warrior, she'll be unstoppable. Falcio, Kest, and Brasti race north to stop her, but in those cold and treacherous climes they discover something altogether different, and far more dangerous: a new player is planning to take the throne of Tristia, and with a sense of dread the three friends realize that the Greatcoats, for all their skill, may not be able to stop him. As the nobles of Tristia and even the Greatcoats themselves fight over who should rule, the Warlord of Avars threatens to invade. With so many powerful contenders vying for power, it will fall to Falcio to render the one verdict he cannot bring himself to utter, much less enforce. Should he help crown the young woman he vowed to put on the throne, or uphold the laws he swore to serve?

In recent years, lesbians and gay men have developed a new, aggressive style of politics. At the same time, innovative intellectual energies have made queer theory an explosive field of study. In "Fear of a Queer Planet", Michael Warner draws on emerging new queer politics, and shows how queer activists have come to challenge basic assumptions about the social and political world. Existing traditions of theory - Marxism, cultural studies, psychoanalysis, anthropology, legal theory, nationalism, and antinationalism - have too often presupposed a heterosexual society, as the essays in this volume demonstrate. "Fear of a Queer Planet" suggests a new agenda for social theory. It moves beyond the idea that lesbians and gay men share a minority identity and special interests and that their issues can be subordinated to more general social conflicts. Instead, Warner and the other contributors to this volume show that queer sexualities take many forms, are the subject of many kinds of conflict and struggles, and must be taken as a starting point in thinking about cultural politics. This collection explores the impact of ACT UP, Queer Nation, multiculturalism, the new religious right, outing, queerness, postmodernism, and other shifts in the politics of sexuality. The authors featured speak from different backgrounds of gender, race, nationality, and discipline. Together, they show how struggles over sexuality have profound implications for progressive politics, social theory, and cultural studies. Michael Warner has written extensively on censorship and the public sphere, the construction of American literary history, and the social and political implication of literary theories. He is author of "The Letter of the Republic: Publication and the Public Sphere in Eighteenth-Century America" and co-editor of "The Origins of Literary Studies in America: A Documentary Anthology".
