The book examines the evolution and current state of corporate social responsibility (CSR), using a five-stage maturity model: defensive, charitable, promotional, strategic and transformative CSR. The first four stages are dubbed CSR 1.0 and characterise most current CSR practice, while the fifth stage is named CSR 2.0 (also transformative or systemic CSR) and describes emergent and future CSR practices. Reasons are given why CSR 1.0 approaches have failed to have any significant impact on the most serious global social, environmental and ethical challenges. The emergent CSR 2.0 will then be explored in detail by elaborating on five principles underlying the new approach, including: creativity, scalability, responsiveness, glocality and circularity. A four-part DNA Model is also introduced, covering value creation, good governance, societal contribution and ecological integrity, which provides the basis for defining and measuring CSR 2.0. Finally, a 70-question CSR 2.0 self-assessment diagnostic tool developed by the author is presented, with sample data to show how the tool can be used for future research and practitioner application.

The economic growth of East and South-East Asia in the context of the global financial crisis has strengthened the view that this region is emerging in the 21st century as the most economically vibrant region in the world. With some of the largest economies, and generally high economic growth rates compared to the rest of the world, it is unsurprising that East and South-East Asia has become the subject of global interest. East Asia's rise inevitably focuses attention on the issue of China's emergence as a regional and global power. Such a prospect challenges the current status quo, in which the region is dominated by the USA and its regional allies, and issues in Sino-US strategic relations have raised global awareness of the need to understand this pivotal region better. In addition, the Taiwan issue continues to evoke nationalist sentiments in China, and North Korea continues to threaten regional stability. Non-traditional (or alternative) security issues are also of major importance in the region, including natural disasters and epidemics, as well as challenges relating to human rights and governance, transnational crime, demographic issues, economics and trade and regionalism. This Handbook aims to offer an insight into these issues. The volume is divided into two main sections. The first, International Relations and Security Perspectives, will focus on the international relations of the region, paying special attention to the key state players. The chapter contributions will examine the security perspectives, and foreign and defence policies of these states, as well as key bilateral relationships. The second section will examine key Regional Non-traditional Security Issues, including globalization, transnational health challenges, population growth and the environment.

Attempting to let 'everyday religion' raise critical questions about how we understand the role of religion in society, this book examines the social circumstances of religion's presence and absence.

This volume brings together the primary challenges for 21st century cognitive sciences and cultural neuroscience in responding to the nature of human identity, self, and evolution of life itself. Through chapters devoted to intricate but focused models, empirical findings, theories, and experiential data, the contributors reflect upon the most exciting possibilities, and debate upon the fundamental aspects of consciousness and self in the context of cultural, philosophical, and multidisciplinary divergences and convergences. Such an understanding and the ensuing insights lie in the cusp of philosophy, neurosciences, psychiatry, and medical humanities. In this volume, the editors and contributors explore the foundations of human thinking and being and discuss both evolutionary/cultural embeddedness, and the self-orientation, of consciousness, keeping in mind questions that bring in the interdisciplinary complexity of issues such as the emergence of consciousness, relation between healing and agency, models of altered self, how cognition impacts the social self, experiential primacy as the hallmark of consciousness, and alternate epistemologies to understand these interdisciplinary puzzles.

This accessible guide to the Gospel and Letters of John introduces readers to key issues arising from historical, literary, and theological approaches to the Johannine literature, also discussing the methodological rationale underlying each of these approaches. After introducing the reader to the development of the narrative structure of the book, the message (theology) is discussed in detail, with the aim of introducing the reader to the interrelatedness of the multiple theological ideas in this Gospel. Similarities, but also differences between the Gospel and Letters are constantly considered. Familiar with the content of the Gospel, readers are then confronted with questions about the origin, development and socio-cultural nature of the Gospel and letters. In each case the scholarly field is briefly reviewed and major solutions are discussed. Thorough discussions on different issues are presented in different chapters, each time referring to the relevant methodological approaches. How do the Gospel and Letters relate to the synoptics, or the Old Testament? Do we have a Gospel composed of multiple sources or is it a seamless document. How was this influential document written and where do the ideas found in the Gospel come from? Since the aim of this book is to form a solid and comprehensive basis for future study of the Johannine literature, readers are placed firmly within the scholarly currents and streams of the Johannine literature. In terms of a metaphor: after reading the book, explorers will know what is out there and why. Now they can start to dig deeper for themselves without feeling lost in an uncharted land.

How religious are Americans these days? How many still believe in God, in Biblical miracles, in heaven and hell? Do people pray? How much money is being given to churches, by Episcopalians, Presbyterians, Roman Catholics, Lutherans, and other groups? American Piety, the first of a three-volume study of religious commitment, answers these and a host of other questions about the contemporary religious scene. Particularly startling are the contrasts in beliefs, practices, and experiences revealed among the eleven major Christian denominations whose membership is compared. The Federal Bureau of Investigation (FBI) is the Nation's premier law enforcement organisation responsible for gathering and reporting facts and compiling evidence in cases involving federal jurisdiction. It has broad jurisdiction in federal law enforcement and in national security, and is a statutory member of the US Intelligence Community. From its official inception in 1908, the FBI's mission, jurisdiction, and resources have grown substantially in parallel with the real or perceived threats to American society, culture, political institutions, and overall security. In 2003 the organisation has approximately 26,000 employees, about 12,000 of whom are Special Agents. The FBI has had many successes in countering criminal and hostile foreign intelligence and terrorist activity in its storied history. However, in its zeal to protect US national security, the FBI occasionally exceeded its mandate and infringed upon the protected rights of US citizens. Currently, the FBI is undergoing a massive reorganisation to shift its culture from reaction to crimes already committed to detection, deterrence and prevention of terrorist attacks against US interests. The FBI continues to be a major domestic and international force in the war against terrorism. This new book covers such issues as: Can the FBI sufficiently adapt its law enforcement culture to deter, detect, and prevent terrorism; Should some of the FBI's criminal jurisdiction be devolved to state and local law enforcement; Should a statutory charter for the FBI be developed; and Does the planned co-location of the FBI's operational Counterterrorism Division with the newly formed Terrorist Threat Integration Center provide an opportunity for foreign intelligence entities to engage in domestic intelligence activities. CONTENTS: Preface; The FBI: Past, Present and Future; FBI Intelligence Reform since September 11, 2001; Index.

Because the twentieth century search for the historical Jesus so heavily favored the Synoptic Gospels, we are long overdue for a reassessment of the evidence presented in the Gospel of John. Craig L. Blomberg offers a foundational introduction and

commentary, focusing with intelligence and care on the historicity of John's Gospel. Discrimination based on sexual orientation and gender identity concerns everybody, but it is foremost lesbian and gay persons who have to deal with it, especially when confronting the discovery of their homosexuality as a child or adolescent. In this book, education practitioners working with youth and researchers - from social, political, and educational sciences, as well as theology and philosophy - raise awareness of the wide spectrum of homophobia and offer solutions to the suffering it engenders in youths. The book will be helpful for parents, teachers, and others who are responsible for youth and education. It reviews concrete knowledge, combines it with scientific approaches, and identifies the need for further research. (Series: Gender-Diskussion - Vol. 13)

This series contains large sections of previously unpublished material in addition to selected published works. Each volume includes a brief historical and biographical introduction, extensive editorial and textual notes, and a full chronological list of all of Peirce's writings, published and unpublished, during the period covered.

This book challenges the modernistic view that because John is theological and different from the Synoptics it cannot be historical.

This book discusses the idea that there is a specific Islamic form of entrepreneurship. Based on extensive original research amongst small and medium sized enterprises in Saudi Arabia, it shows how businesses are started and how they grow in the context of an Islamic economy and society. It argues that as specific Islamic approaches to a wide range of economic activities are being formulated and implemented, there is indeed a particular Islamic approach to entrepreneurship. Examining the relationship between Islamic values and entrepreneurial activity, the book considers whether such values can be more effectively used in order to raise the profile of Islamic entrepreneurship, and also to promote alternatives to development in the contemporary business environment. The book analyses the nature of entrepreneurship, and the special qualities of Islamic entrepreneurship, and discusses how the Islamic approach to entrepreneurship can be encouraged and developed further still

Collins Primary Science fully meets the requirements of the Cambridge International Examinations Primary Science Curriculum Framework, and the material has been carefully developed to meet the needs of primary science students and teachers in a range of international contexts. Content is organized according to the three main strands: Biology, Chemistry, and Physics, and the skills detailed under the Scientific Enquiry strand are introduced and taught in the context of those areas. For each of Stages 1 to 6 as detailed in the Cambridge Primary Science Framework, we offer: - A full color, highly illustrated, and photograph-rich Student's Book; - A write-in Workbook linked to the Student's Book; - This comprehensive Teacher's Guide with clear suggestions for using the materials, including the electronic components of the course; - A DVD-ROM which contains slideshows, video clips, additional photographs, and interactive activities for use in the classroom.

Paul Anderson, a leading scholar of the Fourth Gospel, provides an introductory textbook, crafted for a semester course, which leads students through literary, historical, and theological aspects of the Fourth Gospel's most vexing puzzles. Traditional, historical-critical, and literary-critical approaches are deftly introduced and their limitations evaluated; questions of the Gospel's authorship, composition, relationship to the Synoptics, and origins in particular historical experiences are

succinctly addressed; and distinctive Johannine perspectives on Jesus, the church, and the world are discussed.

Best-selling author of *The One-Minute Manager*, Ken Blanchard, along with Phil Hodges, reveals the meaning of servant leadership modeled after Jesus Christ. Based on Blanchard's and Hodges' Faith Walk seminars, business leaders come to realize that teams are more powerful than the sum of the individuals and to recognize their people as appreciating assets. *Servant Leader* summarizes the Four Dimensions of Leadership: the head (leadership assumptions and methods) the hands (application and leadership behavior) the heart (edging God out) the habits (solitude, prayer, study of scripture, unconditional love, etc.) The thousands who have attended his seminars witnessed the transforming power of this unconventional approach. Readers seeking to grow as leaders and business executives will find *Servant Leader* nothing short of life-changing.

This volume examines emotions and emotional well-being from a rich variety of theological, philosophical and scientific and therapeutic perspectives. To experience emotion is a part of being human; but what are emotions? How can theology, philosophy and the natural sciences unpack the nature and content of emotions? This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi, Italy. It brings together contributions from scholars of various academic backgrounds from around the world, whose individual insights are made all the richer by their juxtaposition with

those from experts in other fields, leading to a unique exchange of ideas. To understand why we humans are as we are, it is necessary to look at the essential building blocks that comprise our nature. The foundations of this structure are our evolutionary origins as primates and our social roots. Upon these rest features such as our emotions, language and aesthetic preferences, with our self-perceptions, self-deceptions and thirst for knowledge right at the top. The unifying force holding these blocks together is evolutionary theory. Evolution provides a deeper understanding of human nature and, in particular, of the common roots of these different perspectives. To build a reliable and coherent model of man, leading authors from fields as diverse as primatology, anthropology, neurobiology and philosophy have joined forces to present essays each describing their own expert perspective. Together they provide a convincing and complete picture of our own human nature.

The Fourth Gospel functions as a literary masterpiece that facilitates a narrative beyond the time and space aspects. The Gospel's linguistic phenomena and stylistic aspects are peculiar as they attune the attention of the readers to a dramatic and ideological world of its own. The connection between the narrator and the readers is established from an eternal vantage point as the narrator directs the readers towards atemporal and universal realities. The peculiar linguistic and idiosyncratic techniques of the narrator have the power to absorb the attention of the readers not only from a 'there and then' and 'here and now' senses but also from an 'everywhere and ever' perspective. In that sense, the Fourth Gospel functions as a gnomic and universalistic artistry. (Publisher).

A list of the one hundred most influential people in history features descriptions of the careers, contributions, and accomplishments of the political and religious leaders, inventors, writers, artists, and others who changed the course of history. Simultaneous.

The aim of this volume is to explore entrepreneurship and business from the perspective of Islamic principles, which are usually based on collaboration, teamwork, generosity and altruism. The contributions deal with the confluence of Islamic Principles with entrepreneurial and business ownership characteristics; resource use by entrepreneurs; means of entrepreneurial success, and ethics and social responsibility.

Why do we protest? What compels us to participate in crowd violence? Can gender discrimination in the workplace be explained in psychological terms? From terrorist attacks to political uprisings, the social problems that have shaped the beginning of the new millenium can be explained using the theories and application of social psychology. Social Psychology of Social Problems does just that, with top international experts examining real-life issues. The book takes the view that if a problem and its origins can be understood, then perhaps it can be prevented from happening again. Social Psychology of Social Problems is required reading for students and practitioners of psychology, social policy and international relations. Provocative and challenging, it will be an essential

resource for those who are seeking a deeper understanding of how social psychology can explain our complex world.
