The latest iPhone models were released on September 19th in the United States and the United Kingdom, and according to Apple, are the “biggest advancements in iPhone history.” It's a clever play on words, as the new models both sport much larger screens than the iPhones of yesteryear. Faced with stiff competition from Android flagships that have long featured big screens, the iPhone 6 and 6 Plus are Apple's authoritative answer to the growing number of iOS fans restlessly awaiting their own big phones. The new phones are powered behind the scenes by Apple's latest software release, iOS 8, which also brings many

features and changes with it.
