The incredible rags-to-riches story of one of the world's greatest motorcycle racers. From humble beginnings in 1930s London, to winning six world titles, Jim Redman MBE is one of GPs most extraordinary characters, and a true legend of motorcycle racing. After migrating to South Africa, he started his racing career in the mid-fifties, and was awarded an MBE in 1964 – a year that also saw him win three World Championships in a single day, a feat, to this day, matched only by Mike Hailwood. During the mid-60s, Jim was THE man to beat on track, but a bad crash at the '66 Belgian GP ended his racing career. Following this, Jim was involved in a number of business ventures – including helping his two sons with their own successful sports careers, and owning a champion sire race horse – until, in 1995, he once again took up a career in racing as a Classic Racer and Demonstration Rider.

Armed with only her magic Spirit Fire bicycle, Susan takes on the owner of a toy shop who is offering free toys to children in order to lure them into the Deeper World.

Two girls use forbidden magic to fly and fight -- for their country and for themselves -- in this riveting debut that's part Shadow and Bone, part Code Name Verity. Seventeen-year-old Revna is a factory worker, manufacturing war machines for the Union of the North. When she's caught using illegal magic, she fears being branded a traitor and imprisoned. Meanwhile, on the front lines, Linné defied her father, a Union general, and disguised herself as a boy to join the army. They're both offered a reprieve from punishment if they use their magic in a special women's military flight unit and undertake terrifying, deadly missions under cover of darkness. Revna and Linné can hardly stand to be in the same cockpit, but if they can't fly together, and if they can't find a way to fly well, the enemy's superior firepower will destroy them -- if they don't destroy each other first. We Rule the Night is a fiercely compelling story about sacrifice, complicated friendships, and survival against impossible odds.

While some travellers look for trouble others unwittingly find themselves in such deep water they are unable to cope. Rey becomes increasingly unhappy as James' father keeps getting in his way and upsetting his plans. Gathering material for his book James finds himself plunged into Rey's world. Events escalate, featuring smuggling, kidnapping and murder.

This is a mind-boggling book. For the enthusiast intent upon restoring his Corvette to the look and condition it enjoyed when it left the factory, it is absolutely essential. For the enthusiast desiring to learn everything - every detail, every nuance which made one Corvette different from another, at model-year changeover, at mid-model, early model-year production, late model-year production - it is the ultimate reference book. This is the history of what happened to the Corvette on the assembly line from 1953 to 1962. It is the story of every Corvette that was produced for a decade. Its engine. Its chassis. Its body. From Powerglide to Positraction to Power Team Combinations. From ignition shielding to hose clamps to identification labels. From windshield wipers to door latch controls to taillight assemblies. It's a bit like a mystery book too, and could almost be recommended to aficionados of that genre regardless of their interest in Corvettes or even cars for that matter. To write this book Noland Adams had to become something of a Sherlock Holmes.

Puffins are among the most instantly recognisable, iconic and well loved of birds. For many they are a highlight of the UK's summer coastline and their colourful appearance, comedy antics and approachability just add to their popularity. Several 'hotspot' are attracting high levels of interest in visits to their colonies. In spite of the high level of interest in, and appeal of, these birds there has been a surprising lack of books focused on Puffins as a species. Award-winning wildlife photographer Mark Sisson has spent several years photographing Puffins and this new book combines images that beautifully encapsulate their charm and visual appeal with an accessible text written by leading wildlife writer Dominic Couzens. The book covers the birds' life cycle, behaviour, habitats and the current and future challenges that they face, along with many surprising facts and anecdotes.
