Since its founding in 1956 in Spain's Basque region, the Mondragón Corporation has been a touchstone for the international cooperative movement. Its nearly three hundred companies and organizations span areas from finance to education. In its industrial sector Mondragón has had a rich experience over many years in manufacturing products as varied as furniture, kitchen equipment, machine tools, and electronic components and in printing, shipbuilding, and metal smelting. Making Mondragón is a groundbreaking look at the history of worker ownership in the Spanish cooperative. First published in 1988, it remains the best source for those looking to glean a rich body of ideas for potential adaptation and implementation elsewhere from Mondragón's long and varied experience. This second edition, published in 1991, takes into account the major structural and strategic changes that were being implemented in 1990 to allow the enterprise to compete successfully in the European common market. Mondragón has created social inventions and developed social structures and social processes that have enabled it to overcome some of the major obstacles faced by other worker cooperatives in the past. William Foote Whyte and Kathleen King Whyte describe the creation and evolution of the Mondragón cooperatives, how they have changed through decades of experience, and how they have struggled to maintain a balance between their social commitments and economic realities. The lessons of Mondragón apply most clearly to worker cooperatives and other employee-owned firms, but also extend to regional development and stimulating and supporting entrepreneurship, whatever the form of ownership.

Un manual ideal para profesionales, aprendices y especialistas de la electronica."

In its front-page review of *Alternating Current*, *The New York Times Book Review* called Octavio Paz "an intellectual literary one-man band" for his ability to write incisively and with dazzling originality about a wide range of subjects. This collection of his essays is divided into three parts. Part 1 sets forth his credo as an artist and poet, steeped in his knowledge of world literature and Mexican art and history and buttressed by readings of writers from Mexican poet

Luis Cernuda to D. H. Lawrence, Malcolm Lowry, André Breton, and Carlos Fuentes. Part 2 deals with themes such as Western individualism versus plurality and flux in Eastern philosophy, atheism versus belief, nihilism, liberated man, and versions of paradise. In Part 3, Paz writes of politics and ethics in essays on revolt and revolution, existentialism, Marxism, the third world, and the new face of Latin America. A scintillating thinker and a prescient voice on emerging world culture, Paz reveals himself here as “a man of electrical passions, paradoxical visions, alternating currents of thoughts, and feeling that runs hot but never cold” (Christian Science Monitor).
