An important feature of the new edition is the alignment of the activities with the Common Core Math Standards for algebra for grades six through high school. Every standard is supported by at least one activity, and many are supported by two or more. The rest of the activities address prerequisite skills related to the standards. The number and diversity of the activities in this resource will help teachers to meet the needs of the various abilities and learning styles of their students. The book is designed for easy use. Each section is divided into two parts: a summary of the activities, which includes teaching notes and answers, followed by the reproducibles of the section. The activities stand alone and can be used to supplement instruction and reinforce skills and concepts. Many are self-correcting, a feature that adds interest for students and saves time for teachers. The nine sections of the book are: Section 1: The Language of Algebra (Using Whole Numbers) Section 2: Integers, Variables, and Expressions Section 3: Linear Equations and Inequalities Section 4: Graphing Linear Equations and Inequalities Section 5: Basic Operations with Monomials and Polynomials Section 6: Factors of Monomials and Polynomials Section 7: Complex Numbers Section 8: Polynomial, Exponential, and Logarithmic Functions and Equations Section 9: Potpourri

There are certain mistakes that students frequently make while learning algebra. This workbook clearly explains these mistakes so students can avoid them. Examples then illustrate the correct way of working an algebra problem, and practice problems are provided. Puzzles and games based on scientific formulas and interesting facts challenge students to think creatively. Self-checking exercises motivate students to finish each page while acquiring valuable algebraic skills.

?This book examines promoting engagement for children and adolescents from challenging contexts or who are dealing with challenging conditions. The volume concentrates on three vulnerable groups: marginalized youths who have experienced repeated exclusion and sought their second chance in alternative education; children who are coming from economically, culturally, and linguistically disadvantaged backgrounds; and students with social or emotional issues. It defines engagement as evolving over the course of learning, an interpersonal as well as personal process involving students, learning environment, teachers, and peers. Chapters identify the complex personal, sociocultural, economic, and systemic barriers that keep these vulnerable students from fully engaging in school, and explore the enabling role of collaborative and supported learning activities in building academic success and a foundation for productive adult lives. In addition, chapters present instructional practices based on engagement enablers. Chapters also pinpoint specific learning skills and subject areas that can provide openings for promoting motivation and participation. Featured topics include: The importance of cognitive and social enablers for promoting learning engagement. Engagement in instruction from teachers and testing within classrooms. Student voice and perspective as a reading engagement enabler. Promoting academic engagement and aspiration for challenging and advanced mathematics. Alternative educational programs for re-engaging marginalized youths who “don’t fit”. Empowering Engagement is a must-have resource for researchers, scientist-practitioners, clinicians, and graduate students in the fields of child and school psychology, educational policy and politics, social work, motivation and learning, schooling and pedagogies, and related disciplines.

Look, Listen, Learn, LEAD: A District-Wide Systems Approach to Teaching and Learning in PreK-12 lays out the transformational journey of Hampton City Schools (HCS), an urban school division of 30 schools in southeastern Virginia. Our school district faces numerous challenges, such as 62% of students receiving free and reduced-price lunch and 14% of students holding an IEP, and in 2015-2016, Hampton City Schools' state accreditation rate was approximately half the statewide rate and on a downward trend. In only three years, that was turned around and HCS exceeded the statewide accreditation rate, a more than 100% improvement with 100% of our schools accredited without conditions. We attribute this in large part to our dedicated educators and their implementation of district-wide systems for curriculum, instruction, checking for student understanding, climate, and culture. The goal of this book is to break down the process of what it takes to bring about large-scale educational change that is sustainable. We describe a process for developing a strong mission and vision to undergird the work around a variety of district-wide systems. This book provides insights into how to improve climate and culture, create a guaranteed and viable written curriculum, establish a process for evaluating its implementation, and create a balanced assessment framework to measure student success. Complete with example templates, action plans, and lessons learned, this book is a true example of theory-into-practice to bring about sustained improvement for all learners.
