Based on the market-leading Operations Management text, this is the ideal book for those wanting a more concise introduction to the subject, focusing on essential core topics, without compromising on the authoritative, clear and highly practical approach that has become the trademark of the authors. Revised and updated to reflect the ever-changing world of operations management, the book is rooted in real-life practice with a wealth of examples and case studies from different sectors and industries around the world.

“This is essential reading for anyone seeking to compete—and succeed—in the flat world.” —John Hagel, Chairman of Deloitte Center of Innovation “Competing in a Flat World provides an extraordinary glimpse into a new kind of organizational architecture, one built around the notion of orchestrating resources you don’t control and doing so in a way that builds both trust and agility. This architecture may well turn out to be the dominant model of the firm for the 21st century. This book is a must read for anyone who wants to compete in a flat world. Every chapter details new and powerful ideas.”

—John Seely Brown, Former Chief Scientist of Xerox Corporation and coauthor of The Only Sustainable Edge “We are led by unstoppable economic forces to connect our resources to form smart networks, either wired or unwired. The authors bring forward the notion of ‘network orchestration,’ an almost one-size-fits-all strategy for organizations to survive and excel in an ever-flattening world.” —John Chen, Sybase Chairman, CEO and President In the “flat world,” everything changes...above all, what it takes to run a winning company. Success is less about what the company can do itself and more about what it can connect to. Find out how it’s done, from the company that pioneered “flat world” success, Li & Fung, which produces more than \$8 billion in garments and other goods for the world’s top brands and retailers—without owning a single factory. Victor and William Fung and Jerry Wind, author of the best-selling The

Power of Impossible Thinking, reveal how they've replaced "old-fashioned" infrastructure and huge employee bases with a fluid, ever-changing network that can design, manufacture, and deliver almost anything, anywhere. The key to success in this world is a set of principles for "network orchestration," described for the first time in this book. They examine how these principles can be applied in manufacturing, services and other industries. They show how to build and orchestrate your own world-class global network. * Compete "network vs. network"—and win! * Create a "big-small" company that combines scale and agility * Forge loose-tight relationships with suppliers * Balance control with empowerment, stability with renewal * Manage the "bumps" in the flat world—from politics to terrorism Visit the authors' website:

Written by best-selling authors in their field, the Fourth Edition of Operations and Process Management inspires a critical and applied mastery of the core principles and process which are fundamental to successfully managing business operations. Approaching the subject from a managerial perspective, this brand new text provides clear and concise coverage of the nature, principles, and practice of operations and process management.

Features - Operations Management: Sustainability and Supply Chain Management provides a broad introduction to operations in the contemporary business environment. It explains operations management (OM) concepts in a realistic and practical manner by using case studies related to a wide range of products, services, and sectors from around the globe. An extensive collection of practice problems is included in the book to encourage application-oriented, active learning. These problems are supported by various solved problems and worked examples that can help students to complete and understand assignments even when they are not in class.

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of the MyLab(tm)and Mastering(tm) platforms exist for each title, and registrations are not transferable. To register for and use MyLab or Mastering, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for the MyLab platform may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. For undergraduate and graduate courses in operations management. This package includes MyLab Operations Management. A balanced approach to supply chain management Smart managers understand that firms do not act alone to produce products and services. Managing Supply Chain and Operations shows students who may all be involved, and how and why supply chain and operations management is important to their future careers. This text takes a balanced approach and, while rigorous, is not solely focused on quantitative material. The authors employ a four-part integrative model throughout the text that ties together the key functions of supply chain, operations, and customer relationship management that focuses on improving, innovating, and integrating in these areas. With cutting-edge material and an up-to-date global approach, the 2nd Edition is filled with scenarios and real-world examples that will prepare today's students to be tomorrow's successful managers. Personalize learning with MyLab Operations Management By combining trusted authors' content with digital tools and a flexible platform, MyLab personalizes the learning experience

and improves results for each student. 0134855442 / 9780134855448 Managing Supply Chain and Operations: An Integrative Approach Plus MyLab Operations Management with Pearson eText -- Access Card Package, 2/e Package consists of: 0134739833 / 9780134739830 Managing Supply Chain and Operations: An Integrative Approach, 2/e 0134855442 / 9780134855448 Managing Supply Chain and Operations: An Integrative Approach Plus MyOMLab with Pearson eText -- Access Card Package, 2/e

This text combines the market leading writing and presentation skills of Bill Stevenson with integrated, thorough, Excel modeling from Ceyhun Ozgur. Professor Ozgur teaches Management Science, Operations, and Statistics using Excel, at the undergrad and MBA levels at Valparaiso University --and Ozgur developed and tested all examples, problems and cases with his students. The authors have written this text for students who have no significant mathematics training and only the most elementary experience with Excel.
