Management Issues Preface A few years ago, I put

together a collection of my thoughts regarding the US FDA and my personal experiences over 13 years as a

field investigator in Texas. Since then I have had the opportunity to experience a world of new opportunities as

a consultant, so I thought it was time to revisit the

Bubblegum Badge world. Along with a few colleagues, I have added several new sections and have tightened up

some of the language and phrasing. It is, as with

everything in life, still a work in progress.... As I said in

the first edition of this book, I don't intend this book to be

either a roasting or a toasting. I hope what it will do is

provide a glimpse of what the FDA does well, and what it needs to improve on (as evidenced by audit reports from

the Health and Human Services [HHS] Office of

Inspector General [OIG]). The name "Bubble Gum

Badge," by no means suggests a weak or ineffective

organization, rather, it is something my friend from the

Imports Division stated during a happy hour we were at

in 1999. He put it this way: "If you think that gold FDA

badge is going to get you out of trouble, son, you are

wrong! It's a Bubble Gum Badge and is more trouble

than you have ever known.” Thankfully, I did not get into any real trouble as a young man with a great responsibility to protect and serve. There are many ways to keep harmful products from the US market, and some of which take longer than the proverbial slow boat to China. I was a frontline grunt out in the field, conducting the FDA business of the day. Those twelve years and eight months were some of the most challenging and rewarding moments any one person could ask for. When you sit down to eat today or see your family member take their medications or go into surgery, you can rest assured that at least one of the FDA’s finest had at some point in the product’s life cycle taken a look to see if it passed inspection. FDA does the work that is most taken for granted and expected as a given by the US public. Your tax dollars were always hard at work when I was on the job, even though it may not have always appeared that way. I would like to thank the FDA for taking me around the world and giving me the best training anyone can ask for in this quality assurance (QA) business (on-the-job training). FDA needs your help and more regulatory authority for biologics, drugs, and devices. Only Congress can grant more FDA authority, and budget battles seem to be the mainstay. Most of the information I reference comes from the public domain site www.fda.gov. The FDA’s mission is too important not to be modernized, supported, and innovated. FDA falling behind in modernization would mean lives at risk globally. The oversight of our global health market is waiting. If you want it and qualify, your official gold FDA badge is waiting for you. FDA has mine in a vault next to

my government international passport (I have my old decommissioned one). Anyone reading this book can be an FDA Consumer-safety officer (CSO)/investigator. Trust me when I say sixty semester hours of accredited college science and some luck on the computer lottery (usaJobs.opm.gov) and you're in. I would suggest higher than a Bachelor of Science education for entry into bioresearch monitoring. As an ex-FDA recruiter and mentor to many new hire FDA field investigators, I would say a graduate degree or higher also assures your entry to drug and device program field work. So, take a look behind the kitchen, Pharmacy, and hospital operation-room doors with me. Thank you, global health providers and professionals (all of you)! Thank you, health-care receivers, all of you; without you, there would be no need for health-care products. I think that includes everyone in the world! Thank you for your time and for coming along to take a microscopic view into one of the most unsung agencies. FDA has very little glitz or glamour and I hope you find something you find interesting in this book.

While students today have access to more sources of information than ever before, they are not necessarily equipped to make informed judgments about those sources. Teaching students to evaluate sources has become even more challenging in the last year, as issues regarding fake news and “alternative facts” have become a heated matter in conversations taking place in the public sphere. The book will present students with a set of tools that they can use to evaluate any source that they encounter. In addition to learning how to use sources in their writing, students who read *Who’s Your Source?* will become more savvy consumers of the sources they encounter in their daily lives.

In *RESEARCH METHODS FOR THE BEHAVIORAL SCIENCES*, 6th Edition, Fredrick J Gravetter and Lori-Ann B. Forzano help students see how interesting and exciting experimental and nonexperimental research can be. The text leads students through the research process from start to finish, including tips and strategies for generating research ideas and hypotheses, selecting measures and participants, and designing research. This step-by-step approach emphasizes the decisions researchers must make at each stage of the process. The authors avoid a cookbook presentation of just the

facts by linking terminology with applied concepts; their lecture in a book style emphasizes clear explanations of topics. Research examples present topics of particular interest to students, and content throughout the book reflects current APA guidelines.
