From a journalist on the frontlines of the Students for Fair Admission (SFFA) v. Harvard case comes a probing examination of affirmative action, the false narrative of American meritocracy, and the attack on Asian American excellence with its far-reaching implications—from seedy test-prep centers to gleaming gifted-and-talented magnet schools, to top colleges and elite business, media, and political positions across America Even in the midst of a nationwide surge of bias and incidents against them, Asians from coast to coast have quietly assumed mastery of the nation's technical and intellectual machinery and become essential American workers. Yet, they've been forced to do so in the face of policy proposals?written in the name of diversity?excluding them from the upper ranks of the elite. In An Inconvenient Minority, journalist Kenny Xu traces elite America's longstanding unease about a minority potentially upending them. Leftist agendas, such as eliminating standardized testing, doling out racial advantages to "preferred" minorities, and lumping Asians into "privileged" categories despite their deprived historical experiences have spurred Asian Americans to act. Going beyond the Students for Fair Admission (SFFA) v. Harvard case, Xu unearths the skewed logic rippling countrywide, from Mayor Bill de Blasio's attempted makeover of New York City's Specialized School programs to the battle over "diversity" quotas in Google's and Facebook's progressive epicenters, to the rise of Asian American activism in response to unfair perceptions and admission practices. Asian Americans' time is now, as they increase their direct action and amplify their voices in the face of mounting anti-Asian attacks. An Inconvenient Minority chronicles the political and economic repression and renaissance of a long ignored racial identity group?and how they are central to reversing America's cultural decline and preserving the dynamism of the free world.

A brilliant and moving novel about celebrity, sexual power, and a daughter's search to understand her mother's hidden truths. Katherine O'Dell is an Irish theater legend. As her daughter, Norah, retraces her mother's celebrated career and bohemian life, she delves into long-kept secrets, both her mother's and her own. Katherine began her career on Ireland's bus-and-truck circuit before making it to London's West End, Broadway, and finally Hollywood. Every moment of her life is a performance, with young Norah standing in the wings. But the mother-daughter romance cannot survive Katherine's past or the world's damage. With age, alcohol, and dimming stardom, Katherine's grip on reality grows fitful. Fueled by a proud and long-simmering rage, she commits a bizarre crime. As Norah's role gradually changes to Katherine's protector, caregiver, and finally legacy-keeper, she revisits her mother's life of fiercely kept secrets; and Norah reveals in turn the secrets of her own sexual and emotional coming-of-age story. Her narrative is shaped by three braided searches—for her father's identity; for her mother's motive in donning a Chanel suit one morning and shooting a TV producer in the foot; and her own search for a husband, family, and work she loves. Bringing to life two generations of women with difficult sexual histories, both assaulted and silenced, both finding—or failing to find—their powers of recovery, Actress touches a raw and timely nerve. With virtuosic storytelling and in prose at turns lyrical and knife-sharp, Enright takes readers to the heart of the maddening yet tender love that binds a mother and daughter.

Joe Pappalardo's Inferno tells the true story of the men who flew the deadliest missions of World War II, and an unlikely hero who received the Medal of Honor in the midst of the bloodiest military campaign in aviation history. There's no higher accolade in the U.S. military than the Medal of Honor, and 472 people received it for their action during World War II. But only one was demoted right after: Maynard Harrison Smith. Smith is one of the most unlikely heroes of the war, where he served in B-17s during the early days of the bombing of France and Germany from England. From his juvenile delinquent past in Michigan, through the war and during the decades after, Smith's life seemed to be a series of very public missteps. The other airmen took to calling the 5-foot, 5-inch airman "Snuffy" after an unappealing movie character. This is also the man who, on a tragically mishandled mission over France on May 1, 1943, single-handedly saved the crewmen in his stricken B-17. With every other gunner injured or bailed out, Smith stood alone in the fuselage of a shattered, nameless bomber and fought fires, treated wounded crew and fought off fighters. His ordeal is part of a

forgotten mission that aircrews came to call the May Day Massacre. The skies over Europe in 1943 were a charnel house for U.S. pilots, who were being led by tacticians surprised by the brutal effectiveness of German defenses. By May 1943 the combat losses among bomb crews were a staggering 40 to 50 percent. The backdrop of Smith's story intersects with some of the luminaries of aviation history, including Curtis Lemay, Ira Eaker and "Hap" Arnold, during critical times of their storied careers. *Inferno* also examines Smith's life in a new, comprehensive light, through the use of exclusive interviews of those who knew him (including fellow MOH recipients and family) as well as public and archival records. This is both a thrilling and horrifying story of the air war over Europe during WWII and a fascinating look at one of America's forgotten heroes.

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. *Our Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." —Katie Patrick, author of *How to Save the World*

In *The Making of Medieval Forgeries*, Alfred Hiatt focuses on forgery in fifteenth-century England and provides a survey of the practice from the Norman Conquest through to the early sixteenth century, considering the function and context in which the forgeries took place. Hiatt discusses the impact of the advent of humanism on the acceptance of forgeries and stresses the importance of documents to medieval culture, offering a discussion of the relation of the various versions of the chronicle of John Hardyng to the documents he forged, as well as documents pertaining to the charters of Crowland Abbey and various bulls and charters connected with the University of Cambridge. A considerable portion of the book concerns the Donation of Constantine, which involves many continental writers, German, French, and Italian. *The Making of Medieval Forgeries* further discusses the 'multiplicity of audiences' for forgeries: those that produce, those that approve, and those that are hostile.
