'This book is a most timely academic intervention. The concept of universalism is central to social policy and welfare state development yet it is rarely explored with such attention to its time and place specificities as in this book. Nordic and British authors investigate the different dimensions and meanings of universalism and the challenges it has faced. Buffeted by markets and choice on the one side and diversity on the other, can universalism survive? To find out, read on...' - Fiona Williams, University of Leeds, UK 'Universalism in social policy is politically challenged and normatively contested. This book examines how the principle of universalism can be understood and how it has been put into practice in various national contexts. Universalism is contrasted with the idea of diversity which has gained strength as a result of growing affluent middle classes and of multiculturalism in highly developed welfare states. The book deals with varieties of universalism and inspires a re-thinking of the normative basis of the welfare state.' - Stein Kuhnle, University of Bergen, Norway and Hertie School of Governance, Berlin, Germany Welfare State, Universalism and Diversity is a thought-provoking book dealing with key ideas, values and principles of

social policies and asking what exactly is meant by universal benefits and policies? Is the time of post-war universalism over? Are universalism and diversity contradictory policy and theory framings? Well-known scholars from different countries and fields of expertise provide a historically informative and comprehensive view on the making of universal social policies. Universalism is defined and implemented differently in the British and Scandinavian social policies. Service universalism is different from universalism in pensions. The book underlines the multiple and transformative nature of universalism and the challenge of diversity. There certainly is need for a greater diversity in meeting citizen's needs. Yet, universalism remains a principle essential for planning and implementing sustainable and legitimate policies in times characterized by complex interdependences and contradictory political aims. This impressive book is an attempt to untangle the multiple meanings of universalism and clarify the concept's relevance to contemporary policy debates. It will prove invaluable for students, researchers and practitioners in social policy, public policy, social administration, social welfare, social history, social work, sociology and political sciences. Policymakers and administrators involved with social and public policies, social services, social welfare, and social work will also find this book groundbreaking.

Peter Conrad, who was born in Tasmania, has produced an original and highly personal account of the role islands play in our dreams and nightmares. With his customary wide range of reference and quick wit, he visits every corner of the globe to explain why islands appeal to us, and on the way covers everything from the myth of Atlantis to Watteau's erotic Cytherea, from Prospero's magical kingdom to Nelson Mandela's prison. Whether we live on an island or merely fancy escaping to one, we can all learn something from this thought-provoking book.

Life can be beautiful, but it takes a little work... "The problem with cutting your own hair is that once you start, you just keep cutting, trying to fix it, and the truth is, some things can never be fixed. The day of my daddy's funeral, I cut my bangs until they were the length of those little paintbrushes that come with dime-store watercolor sets. I was nine years old. People asked me why I did it, but I was too young then to know I was changing my hair because I wanted to change my life." In 1983, on her nineteenth birthday, Zora Adams finally says goodbye to her alcoholic mother and their tiny town in the mountains of South Carolina. Living with a woman who dresses like Judy Garland and brings home a different man each night is not a pretty existence, and Zora is ready for life to be beautiful. With the help of a beloved teacher, she moves to a coastal town and enrolls in the Davenport School of Beauty. Under the tutelage of Mrs. Cathcart, she learns the art of fixing hair, and becomes fast friends with the lively Sara Jane

Farquhar, a natural hair stylist. She also falls hard for handsome young widower Winston Sawyer, who is drowning his grief in bourbon. She couldn't save Mama, but maybe she can save him. As Zora practices finger waves, updos, and spit curls, she also comes to learn that few things are permanent in this life—except real love, lasting friendship, and, ultimately... forgiveness.

The small town of Delphi, Colorado wasn't like most towns. New people were always coming and going, there were large numbers of animal attacks in the surrounding woods, and a suspiciously high rate of missing persons. This was the town where seventeen-year old Eden Day had lived her entire life. Eden and her three best friends, Mel, Wes, and Jasmine love to hang out, eat junk food, watch too much television and dream about someday leaving Delphi to see the world. That was until the dark rainy night when Eden was walking home alone in the woods and was attacked by a vampire. Bleeding and broken she crawled into an old abandoned church...where she died. Miraculously coming back to life, she senses something within her is changing. Is she still human? Is she becoming a vampire? Something that would be terribly inconvenient considering she's a vegetarian. In her quest to discover what is happening to her, Eden meets Oswald Chang, a genius computer geek with extensive knowledge of the Supernatural. Through him she learns of the secrets behind her town and her newfound connections to them. As the vampire attacks increase, Eden must learn to embrace what she is becoming in order to protect all that she holds close. If she can do this while still passing English and avoiding the irresistibly charming, but equally infuriating new boy in town Eden just might have a chance of surviving till her graduation.

To help the researcher understand why and how children react to adults who are doing ethnographic research, Fine and Sandstrom explore the methodological and ethical problems of qualitative research with minors. They correct numerous fallacies held by researchers that children think like adults and that they cannot hide their thoughts and feelings from adults, especially strangers. Recognizing that age is an important determinant of children's response, they discuss problems and present strategies for conducting research with three age groups of children: preschool children (4 to 6 year olds), preadolescents (10 to 12) and middle adolescents (14 to 16). This is the first major methodological statement on doing participant observation work w

The truth lies between where people judge it to be and where it actually resides. Told through the point of view of the cantankerous Trudy Pluth, who is a person of interest in the death of wealthy recluse Lyle Staybler, *Luce Women* is more than a mystery. Trudy's circle of friends help with renovation of old houses and offer support during the crisis. It's a diverse group: one Minnesota-nice friend is trying to hide her sadness and fears; another is a transplant from the East who is out of place in the small town of Luce; and a third is a gossip who thrives on small town scandals. Their bond lies in the fact that they are much more than *Luce Women*.
