ABAP (Advanced Business Application Programming) is a powerful programming language created specifically for developing SAP applications. "ABAP Objects" is the new object-oriented generation of this language, designed to respond to the needs of SAP's future strategies and environments. Written by two leading experts and approved by SAP's ABAP Language Group, "ABAP Objects" provides an in-depth and comprehensive introduction to SAP application programming for Release 4.6. The focus is on ABAP Objects, which is treated here not as an add-on, but as an integral part of the ABAP language. An indispensable guide for novice and experienced programmers alike, " ABAP Objects " includes coverage of these essential topics: The new ABAP Workbench and the most important features of the ABAP language. The fundamentals of ABAP programming, including the ABAP runtime environment. The core ABAP language elements. The two ABAP programming models - classical and object-oriented - and their relevant statements. Advanced concepts of OO programming with ABAP Objects. Programming the SAP user interface. Database access with OpenSQL. ABAP glossary and a complete list of system fields. The book also includes two CDs carrying a fully operational SAP Basis System, and containing all the example programs from the book. 0201750805B04022002 SAP ABAP (Advanced Business Application Programming) offers a detailed tutorial on the numerous features of the core programming platform, used for development for the entire SAP software suite. SAP ABAP uses hands on business oriented use cases and a valuable dedicated e-resource to demonstrate the underlying advanced concepts of the OO ABAP environment and the SAP UI. SAP ABAP covers the latest version (NetWeaver 7.3 and SAP application programming release 6.0) of the platform for demonstrating the customization and implementation phases of the SAP software implementation. Void of theoretical treatments and preoccupation with language syntax, SAP ABAP is a comprehensive, practical one stop solution, which demonstrates and conveys the language's commands and features through hands on examples. The accompanying e-resource is a take off point to the book. SAP ABAP works in tandem with the accompanying e-resource to create an interactive learning environment where the book provides a brief description and an overview of a specified feature/command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e-resource, where a step-by-step guide to creating and running

the feature's object is available. The presentation of the features is scenario oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature/command are conveyed through execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects including the programs rely on some of the SAP application tables being populated, for example an IDES system which is now a de facto system for all SAP training related activities.
