Higher Education is of utmost significance for the balanced development of an economy, especially for a developing country like India. Towards achievement of this goal the University Grants Commission was established which coordinates and determines the standards of higher education in Universities and colleges.

When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. Germano also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, *From Dissertation to Book* reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add "author" to their curriculum vitae.

With the development of mobile internet technology, people's lifestyle and consumer behavior are changing rapidly. Nowadays, the products on the market are updating more and more frequently, and the traditional marketing theory and brand theory fail to get with the mobile internet. So, what's the innovative marketing to take in the new era? Since 2012, China has entered into the mobile era, and became a major country of mobile internet application. The book summarizes the experience of the author accumulated from many trials and errors in management and marketing innovation, so as to form the pattern of management and marketing for the next 30 years. Mobile Marketing Management lays the foundation for the new era with four pillars: service, substance, superuser, space, known as 4S theory for short. In view of the concept of customer-first, it is all about service, and products become productized service concepts. In view of the failure of mass communication, the competition among all services becomes the competition of substance differentiation. Regarding the popularity of self-organization, it becomes a trend to cooperate with people rather than the company to develop the market. In view of the principle of fuzzy market boundary, the enterprises shall optimize their living space and evolve their development space. This book contains numerous case studies along with analysis and creates the discipline of mobile marketing management, providing innovative theories, methods and tools for the marketing of enterprises. Through this book, readers can master the marketing methods of the mobile internet era. They can apply the marketing theory in this book to guide the marketing practice, thus improving marketing efficiency and reducing marketing costs.

"Narrative is the stuff of community. The book embarks on a quest to understand how narrative works to take an inchoate group of individuals and turn it into a cohesive social movement. To understand the power of narrative, the authors examine the particular phenomenon of climate skepticism. Somehow, the narrative of climate skepticism has been able to forge a movement and stake a challenge to the hegemony of the larger community of scientists on what is ostensibly a matter of science. The book asks: how is this achieved? What is the narrative of climate skepticism, and how has it evolved over time and diffused from place to place? Is it possible that this narrative shares with other narratives an underlying genetic code of sorts, a story that is more fundamental than all of these? How has the climate skeptical narrative contended with its other, which is the narrative-network of climate change science, and forged its own social movement? The outcome of this struggle between climate science and its denial has implications for society that go far beyond climatology. Using narrative analysis, the authors demonstrate how the narrative lens allows us unique insights into these questions. The book takes the reader on a journey, across times and places and social realms and, throughout, we see the power of narrative at work, making believers, or skeptics, of us all"--
