Learning agility is not a new concept, but it took years of research to prove that it really does exist, and can be quantified on an individual level. Out of that research came the introduction of the Burke Learning Agility Inventory (Burke LAI) as the first reliable, theoretically grounded way to measure learning agility. This book explains how learning agility is measured, and explores the ways that this information can be developed and applied by individuals and organizations.

Are risk-takers born or made? Why are some more willing to go out on a limb (so to speak) than others? How do we weigh the value of opportunities large or small that may have the potential to change the course of our lives? These are just a few of the questions that author Kayt Sukel tackles, applying the latest research in neuroscience and psychology to compelling real-world situations. Building on a portfolio of work that has appeared in such publications as Scientific American, Atlantic Monthly, The Washington Post, and more, Sukel offers an in-depth look at risk-taking and its role in the many facets of life that resonates on a personal level. Smart, progressive, and truly enlightening, *The Art of Risk* blends riveting case studies and hard-hitting science to explore risk-taking and how it impacts decision-making in work, play, love, and life, providing insight in understanding individual behavior

At just twenty-two years of age, Briana Mills finds herself at a desperate crossroads. Once a promising student at the University of Oregon, she now finds herself alone on the streets of Portland with only the clothes on her back, memories of a happier time, and the stray dog that's adopted her. And she's got the drug that helps her forget. Briana's mistakes haunt her, lashing her with severe consequence, forcing her to make a decision few would ever make. Still, in a final attempt to make her young life count for something, Briana begins writing it all down—everything—so that others walking the crumbling precipice of rebellion might leap to safety before it's too late. She writes about her present struggles and the past. She writes about Michael, the boy she loved and left behind when she went off to college. She writes about the violent activism and drug that derailed her life. She writes about the demands placed on her by a socially conscious mother, and the adoration shown by a proud father. And Briana talks about Brody—the young activist leader who captured her heart, took it to the altar, and then crushed it. What develops is an engrossing record of a young and troubled life, one both beautiful and ugly, innocent and corrupt, lost and then found. And wrapped in its literary sinew is a cast of characters as diverse and engaging as the stars, and an impassioned love story sure to

transcend time. What readers are saying: "Timeless...provocative." "Characters so real you'd swear this was a true account." "A brilliant read!" Alone Among People is D. M. Anthony's first novel. He lives in California where he's at work on his next book. This review is from: Alone Among People (Paperback) A Compelling and Heart Warming Story, September 25, 2012 "Alone Among People is at once an engaging, moving story and a provocative statement about the thin line between thriving and sinking into an abyss as inescapable as quicksand. Its timeless and uplifting messages of hope conquering despair, healing borne of love and care, and peace at discovering one's identity are an inspiration. The author's empathy for the characters and their plight betrays knowledge of what he writes, and offers the reader a unique glimpse into a vulnerable and intimate place... his heart. I recommend this book to anyone who has traveled through the anguish of darkness and longed for the light; it may just guide your way."

There is a misconception, within the teaching profession and the general public, that the establishment are against children being exposed to danger and that schools are prevented from giving children experiences which involve risk. In this superb book, Mike Fairclough, headmaster at West Rise Junior School, has blown that theory out of the water.

You never know what is coming next when you walk with God! Roy Jones had thought he would be working as a railway timetable clerk in London for all of his career. In 1993, on the other side of the world and out of the blue, God challenged him and Shirley to join Youth With A Mission. They never could have imagined what was in store - especially as they'd just been told that their eagerly awaited second daughter would be born with Down's Syndrome. God has been good to the family. In Perfect Timing, Roy tells stories of lessons learned through His faithful guidance and care over more than two decades.

Young people's lives continue to be the topic of public scrutiny and recurring 'moral panics'. Smoking cannabis, speeding, and engaging in street-level fights are depicted as activities based on 'poor choices' or simple hedonism, putting young people's futures at risk. Based on comprehensive, qualitative research with young people in Denmark, this book illustrates how such individualised accounts miss out on the inherently social character of risk-taking activities. Youth, Risk, Routine introduces a new approach to risk-taking activities as being an integral and routinised part of young people's everyday life. By applying social theories of practice, this insightful volume presents a framework for understanding the routinised dimensions of young people's engagement in risk-taking and how this is embedded in, intertwined with, and held in place by other

everyday practices. Indeed, through extensive empirical analyses of the rich material at hand, the authors explore how routinisation, coordination, embodiment, and social context are central aspects for understanding how, why, and when young people engage in risk-taking practices. *Youth, Risk, Routine* will be of interest to students and scholars in sociology, criminology, and social work as well as wider social science audiences, particularly those interested in exploring the empirical potential of social theories of practice.

Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

Gigerenzer, the author of *Reckoning with Risk*. Risk-taking is essential for innovation, fun, and the courage to face the uncertainties in life. Yet for many important decisions, we're often presented with statistics and probabilities that we don't really understand and we inevitably rely on experts in the relevant fields - policy makers, financial advisors, doctors - to analyse and choose for us. But what if they don't quite understand the way the information is presented either? How do we make sure we're asking doctors the right questions about proposed treatment? Is there a rule of thumb that could help choose the right partner? This entertaining book shows us how to recognize when we don't have all the information and know what to do about it. Gerd Gigerenzer looks at examples from every aspect of life to identify the reasons for our collective misunderstanding of the risks we face. He shows how we can all use simple rules to avoid being manipulated into unrealistic fears or hopes, to make better-informed decisions, and to learn to understand risk and uncertainty in our own lives. 'Gigerenzer is brilliant and his topic is fabulous' Steven Pinker 'Catchily optimistic and slyly funny' Guardian Gerd Gigerenzer is Director of the Center for Adaptive Behavior and Cognition at the Max Planck Institute for Human Development in Berlin and former Professor of Psychology at the University of Chicago. He is the author of several books on heuristics and decision making, including *Reckoning with Risk*.

accidents which have plagued our developing technological world. This breakthrough volume presents a new concept and theory that shows how errors can and should be analyzed so that learning and experience are accounted for. The authors show that, by using a universal learning curve, errors can be tracked and managed so that they are reduced to the smallest number possible. The authors have devoted a number of years to gathering data, analyzing theories relating to error reduction, design improvement, management of errors and assignment of cause. The analyzed data relates to millions of errors. They find a common thread between all technology-related accidents and link all of these errors (from the headline stories to the everyday accidents). They challenge the reader to take a different look at the stream of threats, risks, dangers, statistics and errors by presenting a new perspective. The book makes use of detailed illustrations and explores many headline accidents which highlight human weaknesses in harnessing and exploiting the technology we have developed; from the Titanic to Chernobyl, Bhopal to Concorde, the Mary Rose to the Paddington rail crash and examine errors over which we have little or no control. By analyzing the vast data society has collected, the authors show how the famous accidents and our everyday risks are related. The authors prove the strength of their observations by comparing their findings to the recorded history of tragedies, disasters, accidents and incidents in chemical, airline, shipping, rail, automobile, nuclear, medical, industrial and manufacturing technologies. They also address the

No risk, pay the cost. Know risk, reap the rewards. In our risk-avoidance culture, we place a high premium on safety. We insure our vacations. We check crash tests on cars. We extend the warranties on our appliances. But by insulating ourselves from the unknown—the risks of life—we miss the great adventure of living our lives to their full potential. Ben Carson spent his childhood as an at-risk child on the streets of Detroit, and today he takes daily risks in performing complex surgeries on the brain and the spinal cord. Now, offering inspiring personal examples, Dr. Carson invites us to embrace risk in our

own lives. From a man whose life dramatically portrays the connection between great risks and greater successes, here are insights that will help you dispel your fear of risk so you can dream big, aim high, move with confidence, and reap rewards you've never imagined. By avoiding risk, are you also avoiding the full potential of your life? The surgery was as risky as anything Dr. Ben Carson had seen. The Bijani sisters—conjoined twins—shared part of a skull, brain tissue, and crucial blood flow. One or both of them could die during the operation. But the women wanted separate lives. And they were willing to accept the risk to reach the goal, even against the advice of their doctors ...

As a child on the dangerous streets of Detroit, and as a surgeon in operating theaters around the world, Dr. Ben Carson has learned all about risk—he faces it on a daily basis. Out of his perilous childhood, a world-class surgeon emerged precisely because of the risks Dr. Carson was willing to take. In his compelling new book, he examines our safety-at-all-costs culture and the meaning of risk and security in our lives. In our 21st-century world, we insulate ourselves with safety. We insure everything from vacations to cell phones. We go on low-cholesterol diets and buy low-risk mutual funds. But in the end, everyone faces risk, like the Bijani twins did with their brave decision. Even if our choices are not so dramatic or the outcome so heartbreaking, what does it mean if we back away instead of move forward? Have we so muffled our hearts and minds that we fail to reach for all that life can offer us—and all that we can offer life? Take the Risk guides the reader through an examination

Ben Carson grew up in the inner cities of Boston and Detroit with his mother and brother. When his father deserted the family, Ben's mother worked several jobs to support her boys yet worked even harder to encourage them to get an education and follow their dreams. Ben's dreams nearly ended when his anger at being poor and the ridicule of a school mate caused him to snap; he lunged at the boy and cut him with a knife. That brush with attempted murder caused Carson to break down and ask God to turn him around. And turn him around he did. A poor student, Carson under the guidance of his mother and brother became the best student in his class, his school, and ultimately earned a scholarship to Yale. The next time he used a knife was as a neurosurgeon at Johns Hopkins Hospital where he pioneered surgery techniques that not only saved lives but miraculously gave countless children an amazing quality of life. My Life is the story of a young boy who could have remained trapped in poverty were it not for his mother's tough and sacrificial love, his own perseverance that he learned from her example, and his deep faith that called him to do great and mighty things. This book contains a new chapter about Dr. Carson's philosophies of serving one's country, becoming role models for people with disadvantaged backgrounds, using the talents

But the only way to get these items is to time travel. His friends who accompany him on his journey are Diego, Ashley, and Richard. That's when they find out that there is something evil lurking around them. Jess has been in love with her best friend, Kate, for seven years, but her feelings have never been returned. One night they sleep together, and Jess finds out how much it is possible to be hurt by someone close. Jess and Kate struggle to redefine their friendship. They spend a week at Jess's family holiday house in a small seaside town, Awatangi, intending to make the time to talk things through, but the conversations never happen. Kate makes vague promises, but begins to have second thoughts. Jess wants Kate, and nothing else, and is heartbroken that isn't enough. Jess decides – while everything is changing in her life – that she doesn't want to go on living in the city, that she wants to return to Awatangi. Part of her hopes some physical distance between them may help things with Kate, and part of her – frustrated and upset – simply wants to leave Kate behind. In Awatangi, Jess meets Keri, a local lawyer who has also recently returned home. Like Jess, Keri surfs, and like Jess, she seems to feel some attachment to her
